The Effect of ‘Noise’ on Productivity
Noise’ In most environments, well at best, annoys us a lot! At worst, ‘noise’ has a profound effect on our wellbeing and productivity.
Noise, particularly those made by other humans rank as the number one distraction in the workplace.

‘Noise’ distraction & memory retention
The more you attempt to multitask, the more likely you are to be distracted by environmental noise.
Research has indicated that multitaskers are not only more likely to have their attention disrupted by noises, but they also find it harder to get their head back into their original task once distracted.

The Effect of ‘Noise’ on Health
Loud sounds and prolonged exposure to certain noises trigger physiologic stress responses in our bodies such as spikes in blood pressure and heart rate.
Research has shown that even intermittent exposure to loud noises can lead to higher long term stress hormone levels and hypertension.

Open plan offices can be noisy spaces!
We can provide you with a wide range acoustic solutions that will breathe new life into open plan office spaces.
Who wants a booming hollow sound in your workspace? Let’s get together and modernize your acoustic space with live acoustic panels!

Aleviate hollow sounding spaces

Designers of contemporary office spaces have moved away from traditional suspended ceilings to a trendier look with the pipes, ducting and original ceiling deck exposed. Once removed, you are left with hollow sounding acoustically untreated spaces. This poses a problem for office workers.

Ceiling panels for a trendier look

So it’s hard to concentrate in the workplace with all those noisy distractions!

Acoustics is one of the first problems employees mention when thinking about problems in the workplace. Our ceiling panels not only absorb sounds effectively but have a contemporary look and are environmentally friendly.

Baffle rack for busy service ceilings

Acoustic baffles are an effective way of controlling sound, while providing a wide range of design solutions.

Baffles or acoustic baffle rack are ideal for busy service ceilings where space is limited.
